Health Score Overview

Category Breakdown

AI Analysis

While your Salesforce Revenue Cloud org has an overall health score of 80/100, which suggests a generally healthy state, our detailed analysis reveals a concerning number of critical issues (21 total) that pose significant operational and financial risks. The low volume of recent quote lines (4 in 90 days) suggests these critical issues may not yet be heavily impacting your daily sales operations, but they are foundational problems that must be addressed before scaling usage or relying on the platform for critical financial processes.

The most critical area requiring immediate attention is your core financial configuration. We identified that no Legal En-

titles or Finance Books are defined ([LE-001], [FB-006]), which are fundamental requirements for generating invoices and recognizing revenue. Furthermore, 149 active products are missing billing rules, revenue recognition rules, and tax rules ([PBC-001], [PBC-002], [PBC-003]), preventing invoice generation and proper revenue recognition. Coupled with GL treatments lacking mapped accounts ([GL-001]), this indicates that your Revenue Cloud implementation is currently incapable of processing financial transactions accurately, posing a significant compliance and reporting risk.

Beyond core finance, your product catalog readiness for quoting is severely hampered. Six active products lack price book entries ([PB-001]), making them impossible to add to quotes. Four configured bundles are entirely empty ([BN-001]), preventing sales reps from configuring these offerings. A critical MDQ product, "Toner Recycling," is missing essential subscription pricing and charge type configuration ([AP-001]), making it unquotable in a multi-dimensional context. Moreover, a key discount schedule, "Test Overlap Schedule," contains overlapping tiers ([DS-001]), leading to unpredictable and potentially incorrect discounts for quantities in the 10-15 range, directly impacting deal profitability.

Other critical issues include three orphaned subscription records not linked to contracts ([SR-003]), which will prevent them from being included in renewals, and an empty Custom Script "CC_Test_Empty_QCP" ([QCP-001]) which is a placeholder without logic. Numerous warnings also highlight inactive rules referenced by active products, unconditioned price rules, and duplicate evaluation orders, which can lead to unexpected system behavior. To ensure your Revenue Cloud instance can effectively support sales and finance operations, we recommend prioritizing the immediate resolution of the core financial configuration issues, followed by rectifying product catalog readiness and critical pricing inaccuracies. Addressing these foundational problems first will unlock the full potential of Revenue Cloud and prevent future operational roadblocks.

Critical Issues (21)

BN-001 Empty bundle "Copy Machine"

"Copy Machine" has Configuration Type = "Allowed" but has zero product options. The configurator will open with a blank page.

RECOMMENDATION

Add product options to "Copy Machine" or remove its Configuration Type if it's not a bundle.

BN-001 Empty bundle "IT Education Pack"

"IT Education Pack" has Configuration Type = "Allowed" but has zero product options. The configurator will open with a blank page.

RECOMMENDATION

Add product options to "IT Education Pack" or remove its Configuration Type if it's not a bundle.

BN-001 Empty bundle "Projector"

"Projector" has Configuration Type = "Allowed" but has zero product options. The configurator will open with a blank page.

RECOMMENDATION

Add product options to "Projector" or remove its Configuration Type if it's not a bundle.

RR-001 Inactive revenue recognition rules assigned to active products

1 active product(s) reference inactive revenue recognition rules. Revenue will not be recognized for orders containing these products.

RECOMMENDATION

Reactivate the revenue recognition rules or reassign active ones to these products.

TR-001 Active products missing tax rule

149 active product(s) have no tax rule assigned. Tax will not be calculated for orders containing these products.

RECOMMENDATION

Assign an appropriate tax rule to each active product.

TR-002 Inactive tax rules assigned to active products

1 active product(s) reference inactive tax rules.

RECOMMENDATION

Reactivate the tax rules or assign active ones to these products.

FB-006 No finance books found

No finance books exist in this org. Finance books are required for billing and revenue recognition.

RECOMMENDATION

Create at least one active finance book with monthly or quarterly periods.

GL-001 GL treatments with no GL accounts

1 active GL treatment(s) have neither credit nor debit GL accounts mapped. Financial transactions will not be recorded properly.

RECOMMENDATION

Map appropriate credit and debit GL accounts to each active GL treatment.

LE-001 No legal entity defined

No legal entities found in this org. Legal entities are required for invoice generation and tax compliance.

RECOMMENDATION

Create at least one legal entity with complete address information.

PBC-001 Active products missing billing rule

149 active product(s) have no billing rule assigned. Invoices will not be generated for orders with these products.

RECOMMENDATION

Assign an appropriate billing rule to each active product.

PBC-002 Active products missing revenue recognition rule

149 active product(s) have no revenue recognition rule. Revenue will not be recognized for these products.

RECOMMENDATION

Assign a revenue recognition rule to each active product.

PBC-003 Active products missing tax rule

149 active product(s) have no tax rule assigned.

RECOMMENDATION

Assign a tax rule to each active product.

PBC-004 Active products missing charge type

148 active product(s) have no charge type (One-Time, Recurring, Usage) set. Billing will not know how to process these products.

RECOMMENDATION

Set the charge type on each product: One-Time, Recurring, or Usage.

QCP-001 Custom script "CC_Test_Empty_QCP" has no code

"CC_Test_Empty_QCP" (Type: Unknown) exists but contains no code. The script record is a shell with no logic.

RECOMMENDATION

Either add the JavaScript code to "CC_Test_Empty_QCP" or delete the empty script record.

AP-001 MDQ product "Toner Recycling" missing Subscription Pricing, Charge Type

"Toner Recycling" uses Block (MDQ) pricing but is missing: Subscription Pricing, Charge Type. Multi-Dimensional Quoting requires proper subscription configuration to create pricing segments.

RECOMMENDATION

Set Subscription Pricing and Charge Type on "Toner Recycling". MDQ typically requires Subscription Type = "Renewable", Subscription Pricing = "Fixed Price", Charge Type = "Recurring".

SR-003 3 subscription(s) without contract reference

Found 3 subscription record(s) where SBQQ_Contract__c is null. These orphaned subscriptions are not linked to any contract and won't appear in renewals.

RECOMMENDATION

Investigate how these subscriptions were created. Link them to the correct contract or delete if they are test data.

DS-001**Overlapping discount tiers in "Test Overlap Schedule"**

Tier "Tier 1" (1-15) overlaps with Tier "Tier 2" (10-25). Quantities in the overlap range may get the wrong discount.

RECOMMENDATION

Adjust tier boundaries so they don't overlap. Set "Tier 1" upper bound to 10 or adjust "Tier 2" lower bound to 15.

BN-001**Empty bundle "IT Corporate Pack"**

"IT Corporate Pack" has Configuration Type = "Allowed" but has zero product options. The configurator will open with a blank page.

RECOMMENDATION

Add product options to "IT Corporate Pack" or remove its Configuration Type if it's not a bundle.

BR-001**Inactive billing rules assigned to active products**

1 active product(s) reference inactive billing rules. This will block invoice generation for these products.

RECOMMENDATION

Either reactivate the billing rules or reassign active billing rules to these products.

BR-002**Active billing rules missing GL treatment**

4 active billing rule(s) have no associated GL treatment. Revenue from these rules will not be posted to the general ledger.

RECOMMENDATION

Create GL treatments for each billing rule and map them to the appropriate GL accounts.

PB-001**6 active product(s) without price book entry**

"CC_Test_InactiveRules_Product", "CC_Test_NoRules_Product", "CC_Test_RecurringNoFreq_Product", "Password Manager License", "Test Orphan No Price" and 1 more are active but have no price book entry. They cannot be added to quotes.

RECOMMENDATION

Add price book entries for these products or deactivate them if no longer sold.

Warnings (29)

PBC-006

Products referencing inactive rules

1 active product(s) have at least one inactive billing, revenue recognition, or tax rule assigned.

RECOMMENDATION

Review each product and update rule assignments to active rules.

PR-002

Price Rule with no conditions

"Test Conflict Rule B" is active but has no conditions. Without conditions, this rule may apply to all quote lines unexpectedly or do nothing.

RECOMMENDATION

Either complete the conditions for "Test Conflict Rule B" or deactivate it.

PR-002

Price Rule with no conditions

"Test Dead Rule" is active but has no conditions. Without conditions, this rule may apply to all quote lines unexpectedly or do nothing.

RECOMMENDATION

Either complete the conditions for "Test Dead Rule" or deactivate it.

PR-002

Price Rule with no conditions

"Test No Order Rule" is active but has no conditions. Without conditions, this rule may apply to all quote lines unexpectedly or do nothing.

RECOMMENDATION

Either complete the conditions for "Test No Order Rule" or deactivate it.

PR-002

Price Rule with no conditions

"Total Cost of Hardware Products" is active but has no conditions. Without conditions, this rule may apply to all quote lines unexpectedly or do nothing.

RECOMMENDATION

Either complete the conditions for "Total Cost of Hardware Products" or deactivate it.

PR-004 3 rules target the same field

3 active price rules all write to "SBQQ__Quantity__c". The last rule in evaluation order wins, potentially overwriting values set by earlier rules.

RECOMMENDATION

Review and verify the intended execution order: "Set quantity of PRINTERMAINTKIT to twice the quantity of LASER-PRINTER" (order 40) "'Set quantity of WIFIAP based on quantity of LAPTOP" (order 50) "'Set quantity of WIFIAP based on quantity of LAPTOP" (order 50).

DS-002 Discount tier gap in "Test Gap Schedule"

No tier covers quantities 10 to 20. Quantities in this range will receive zero discount.

RECOMMENDATION

Add a tier covering 10-20 or extend existing tier boundaries to close the gap.

DS-003 Negative discount in "Test Negative Discount"

Tier "Surcharge Tier" applies -5% (a surcharge, not a discount). This increases the price instead of reducing it.

RECOMMENDATION

Verify this surcharge is intentional. If not, change the discount to a positive value.

PB-002 Bundle option references inactive product

Product Option "PO-000101" includes "Test License - Active" which is inactive.

RECOMMENDATION

Remove this option from the bundle or reactivate the product.

PB-002 Bundle option references inactive product

Product Option "PO-000100" includes "Test License - Active" which is inactive.

RECOMMENDATION

Remove this option from the bundle or reactivate the product.

PRD-002 2 Selection rules share evaluation order 10

Rules "Test Duplicate Order Rule", "Test Dead Product Rule" are all Selection rules with evaluation order 10. When rules share the same order, execution sequence is unpredictable.

RECOMMENDATION

Assign unique evaluation orders to each rule. Use increments of 10 (10, 20, 30...) for easy insertion later.

PRD-003 Product Rule "Test Duplicate Order Rule" has no conditions or actions

"Test Duplicate Order Rule" (Type: Selection) is active but has neither error conditions nor actions configured. It does nothing.

RECOMMENDATION

Complete the setup for "Test Duplicate Order Rule" or deactivate it.

PRD-003 Product Rule "Test Dead Product Rule" has no conditions or actions

"Test Dead Product Rule" (Type: Selection) is active but has neither error conditions nor actions configured. It does nothing.

RECOMMENDATION

Complete the setup for "Test Dead Product Rule" or deactivate it.

SR-001 1 subscription(s) with zero or missing net price

Found 1 subscription record(s) where SBQQ__NetPrice__c is zero or null. These may represent free subscriptions, but could also indicate pricing was not applied correctly during quoting.

RECOMMENDATION

Review each zero-price subscription. If intentional (e.g., trial/promo), document it. If not, correct the source quote and amend the contract.

SR-002 3 subscription(s) missing prorate multiplier

Found 3 subscription(s) where SBQQ__ProrateMultiplier__c is null or zero. This field controls how subscription pricing scales across co-termed renewals.

RECOMMENDATION

Check the original quote lines for these subscriptions. The prorate multiplier should flow from the quote line during contract creation.

TF-001

4 quote line(s) have both Discount and Additional Discount set

Found 4 quote line(s) where both SBQQ__Discount__c and SBQQ__AdditionalDiscount__c have values. These are "twin fields" in CPQ — Discount is partner/channel discount and Additional Discount is the rep discount. When both are populated, the total discount may be higher than intended because they compound.

RECOMMENDATION

Review your discounting strategy. Typically only one discount field should be used per line. If both are intentional, verify the final NetPrice matches expectations. Consider using Discount Schedules for volume-based pricing instead.

CP-001

1 expired contracted price(s) found

Found 1 contracted price record(s) past their expiration date. These records are no longer applied to quotes but still clutter the system and may confuse users checking account-level pricing.

RECOMMENDATION

Review and delete expired contracted prices, or extend their expiration dates if the pricing agreements were renewed.

CP-001

1 contracted price(s) reference inactive products

Found 1 contracted price record(s) linked to products that are no longer active. These prices will never be applied since the products can't be added to quotes.

RECOMMENDATION

Delete contracted prices for inactive products, or reactivate the products if the pricing agreements are still valid.

CP-001

1 active contracted price(s) with zero or null price

Found 1 active contracted price record(s) where SBQQ__Price__c is zero or null. These will override standard pricebook pricing with \$0.

RECOMMENDATION

Verify each \$0 contracted price is intentional (e.g., promotional/trial pricing). Correct any that should have a value.

AP-004

Recurring product "CC_Test_RecurringNoFreq_Product" has no billing frequency

"CC_Test_RecurringNoFreq_Product" has Charge Type "Recurring" but no Billing Frequency set (Monthly, Quarterly, Annual, etc.). CPQ cannot determine how often to bill the customer.

RECOMMENDATION

Set the Billing Frequency on "CC_Test_RecurringNoFreq_Product" to match your billing cycle (e.g., "Monthly", "Quarterly", "Annual").

PERF-005 CPQ complexity: High (score: 112)

Configuration breakdown: 8 price rules (×3), 6 product rules (×2), 0 summary variables (×1.5), 5 discount schedules (×1), 151 products, 102 product options (×0.5), QCP active (+20). Weighted complexity score: 112. Thresholds: <50 Low, 50-99 Moderate, 100-199 High, 200+ Very High.

RECOMMENDATION

Run ConfigCheck regularly to identify dead rules and consolidation opportunities. Consider simplifying pricing logic where possible.

IA-003 Discount schedules and price rules both modify SBQQ__Discount__c, SBQQ__UnitPrice__c

5 discount schedule(s) exist, and active price rules also target SBQQ__Discount__c, SBQQ__UnitPrice__c. The CPQ calculator evaluation sequence determines which takes precedence. Check SET-001 for the current sequence.

RECOMMENDATION

Verify SBQQ__CalculatorEvaluationSequence__c setting. Test with a sample quote to confirm the intended pricing flow. Document which method (discount schedule vs price rule) should take precedence for each product.

IA-004 1 contracted price(s) linked to inactive products

Found 1 contracted price(s) attached to products that are no longer active. These prices will never apply but may confuse admins reviewing the configuration.

RECOMMENDATION

Review and remove contracted prices for retired products.

BR-004 Duplicate billing rule names detected

1 billing rule name(s) have duplicates. This causes confusion when assigning rules to products.

RECOMMENDATION

Rename duplicate billing rules to be unique and descriptive.

RR-003 Revenue recognition rules with schedule creation disabled

1 active rule(s) have revenue schedule creation disabled. Revenue will not be automatically recognized for products using these rules.

RECOMMENDATION

Enable revenue schedule creation unless there is a specific business reason to handle recognition manually.

TR-003 Active tax rules not marked as taxable

1 active tax rule(s) do not have Taxable set to "Yes". Products using these rules will not have tax applied.

RECOMMENDATION

Set the Taxable field to "Yes" on rules that should calculate tax, or verify these are intentionally tax-exempt.

GL-003 Inactive GL treatments on active GL rules

1 inactive GL treatment(s) exist under active GL rules. Certain transaction types may not post to GL.

RECOMMENDATION

Review and reactivate necessary treatments or remove them if no longer needed.

PBC-005 Recurring products without billing frequency

1 recurring product(s) have no billing frequency set. The system won't know how often to bill.

RECOMMENDATION

Set the billing frequency (Monthly, Quarterly, Annual, etc.) on recurring products.

PR-002 Price Rule with no conditions

"Test Conflict Rule A" is active but has no conditions. Without conditions, this rule may apply to all quote lines unexpectedly or do nothing.

RECOMMENDATION

Either complete the conditions for "Test Conflict Rule A" or deactivate it.

Best Practice Suggestions (15)

BN-005 Bundle "Security Console" has 10 options without feature grouping

"Security Console" has 10 product options but none are organized into features. Feature grouping improves the configurator UX by organizing options into collapsible sections.

LQ-005 Selection rule "Only show US related products when Location is United States" has no evaluation order

"Only show US related products when Location is United States" is an active selection rule without an explicit evaluation order. When multiple selection rules exist, the execution order becomes unpredictable without explicit ordering.

LQ-005**Selection rule "Setting LASERPRINTER auto-selects PRINTERTONER and PRINTERMAINTKIT" has no evaluation order**

"Setting LASERPRINTER auto-selects PRINTERTONER and PRINTERMAINTKIT" is an active selection rule without an explicit evaluation order. When multiple selection rules exist, the execution order becomes unpredictable without explicit ordering.

LQ-005**Selection rule "Only show UK related products when Location is United Kingdom" has no evaluation order**

"Only show UK related products when Location is United Kingdom" is an active selection rule without an explicit evaluation order. When multiple selection rules exist, the execution order becomes unpredictable without explicit ordering.

CA-004**1 required attribute(s) on "IT Professional Pack" without defaults**

"Location (ITPROPACK)" on "IT Professional Pack" are required but have no default value. Users must manually fill these every time they configure the product.

UA-001**147 active products (97%) not quoted in 90 days**

Out of 151 active products, 147 have not appeared on any quote line in the last 90 days. These products add complexity to the configurator without generating revenue.

BR-003**Unused billing rules found**

3 billing rule(s) are not referenced by any product. These may be legacy or test rules.

SV-006**5 inactive summary variable(s)**

5 summary variable(s) are deactivated: "Total Cost of Hardware Products", "Total quantity of LAPTOP15 divided by 12", "Total quantity of LASERPRINTER", "Total quantity of LASERPRINTER multiplied by 2", "Total quantity of PRINTERTONER".

GL-005**1 inactive GL rule(s)**

1 GL rule(s) are inactive: "CC_Test_Inactive_GL_Rule".

PR-003 Price Rule evaluation order has gaps

Evaluation orders are 10, 20, 30, 40, 50, 60, 70, 80 with gaps at positions 11, 12, 13, 14, 15, 16, 17, 18, 19, 21, 22, 23, 24, 25, 26, 27, 28, 29, 31, 32, 33, 34, 35, 36, 37, 38, 39, 41, 42, 43, 44, 45, 46, 47, 48, 49, 51, 52, 53, 54, 55, 56, 57, 58, 59, 61, 62, 63, 64, 65, 66, 67, 68, 69, 71, 72, 73, 74, 75, 76, 77, 78, 79. New rules could accidentally slot into these gaps.

RR-004 Unused revenue recognition rules

3 revenue recognition rule(s) are not assigned to any product.

PRD-005 1 inactive product rule(s)

1 product rule(s) are deactivated: "Test Validation No Logic". Inactive rules clutter the org.

SR-004 1 subscription(s) with quantity > 1,000

Found 1 subscription(s) with unusually high quantities. Examples: "SUB-0000011" (qty: 2000).

CP-003 3 contracted price(s) without source quote line

Found 3 contracted price(s) that were not created from a quote line. These were likely created manually or via data load, making them harder to audit and trace.

TR-004 2 inactive tax rule(s)

2 tax rule(s) are inactive: "CC_Test_Dead_Tax_Rule", "CC_Test_Inactive_Tax_Rule".
